

I believe K-love radio serves me as a resident of this community everyday by keeping me current with LOCAL activities, news and other such information that directly applies to my interests and area.

I believe it would be a serious slap to the local residents who donate their own money to keep this program on the air in our area. Other stations have ways to raise money for their programming but K-love listeners give out of their own pockets for the music, commentaries and etc. that this station provide. The LPFM broadcasting can find another way to reach their goals without usurping our station.

There are many, many more "secular" type stations providing their type of "service" to their clients and it is wrong to deny us our station that we are willing to pay for to keep on the air.

This station has the public interest at heart by offering uplifting testimonies, music that is not "trashing" our institutions of government and by offering free phone lines to talk to ANYONE who feels in need of a "personal" touch. No other type of station replacing this would offer the same to any and all at any and all times. Please do not allow the concern of so called "localism" to override what are the ACTUAL LOCAL interests of this stations public.
